HABA G-Alu25 eloxtop

Milled aluminium plates | cut to size

G-Alu25 eloxtop is a naturally hard cast aluminium plate that meets the highest requirements for machinability and dimensional stability. The special manufacturing process is carried out according to strict HABA factory standards. These standards apply to all process steps and are a guarantee for the excellent guarantee for the excellent properties, homogeneous microstructure as well as gas and vacuum tightness. The high microstructure quality ensures good results in surface finishing.

INSTRUCTIONS

G-Alu25 eloxtop is well suited for machining. The chippings are short and break well. Use tools for working aluminium with a cutting speed >2000 m/min. Threads are produced favourably with thread moulders.

CHEMICAL COMPOSITION

MATERIAL IN USE

Plant and apparatus construction
Vehicle construction
Jig manufacturing
Prototype construction
Mechanical engineering
Toolmaking and mould construction
Ship and offshore construction
Low-temperature technology

APPLICATIONS

Base plates Rotary tables Side walls

Foam, deep-draw and sample moulds

PROPERTIES

machinability very good dimensional stability very good MIG/TIG weldability good Weatherproofness very good Seawater resistance very good Contact with foodstuffs yes

SURFACE TREATMENT

Decorative anodisation good
Protective anodisation very good
Paintwork, coating moderate
Galvanic coating good
Chemical nickel coating good
